The Picture Exchange Communication System Training Manual Lori Frost,Andy Bondy,2002-01-01 This book presents an updated description of The Picture Exchange Communication System (PECS). It begins with a discussion of the big picture, or the authors view on the importance of laying the foundation for communication training by systematically structuring the learning environment (be it in the home, community or school). This approach, The Pyramid Approach to Education, embraces the principals of broad-spectrum applied behavior analysis and emphasizes the development of functional communication skills, independent of communication modality. The Pyramid Approach is one of the few approaches that encourages creativity and innovation on the teacher's part through databased decision making.

Playing, Laughing and Learning with Children on the Autism Spectrum Julia Moor,2008-07-15 Praise for the first

edition: 'An approachable and practical edition that will be welcomed by parents and carers alike. I know how hard it can be to find 'How to' resources for parents. Well here is a gem.' - Children, Young People and Families Parents of young children newly diagnosed as on the autism spectrum are often at a loss for ideas about how best to help their child. *Playing, Laughing and Learning with Children on the Autism Spectrum* is not just a collection of play ideas; it shows how to break down activities into manageable stages, and looks at ways to gain a child's attention and motivation and to build on small achievements. Each chapter covers a collection of ideas around a theme, including music, art, physical activities, playing outdoors, puzzles, turn-taking and using existing toys to create play sequences. There are also chapters on introducing reading and making the most of television. This updated second edition contains an extensive chapter on how to use the computer, the internet and the digital camera to find and make resources and activities, and suggests many suitable websites to help parents through the internet maze. The ideas are useful both for toddlers and primary age children who are still struggling with play.

David Clemesha and Andrea Zimmerman have created a rhythmic, repeatable refrain that will roll off the lips of every child. Dan Yaccarino's dynamic art puts the zip in Mr. Gilly's stride and adds style and charm to trash collection. 2000 Notable Children's Books (ALA)

The Zones of Regulation Leah M. Kuypers, 2011 ... a curriculum geared toward helping students gain skills in consciously regulating their actions, which in turn leads to increased control and problem solving abilities. Using a cognitive behavior approach, the curriculum's learning activities are designed to help students recognize when they are in different states called zones, with each of four zones represented by a different color. In the activities, students also learn how to use strategies or tools to stay in a zone or move from one to another. Students explore calming techniques, cognitive strategies, and sensory supports so they will have a toolbox of methods to use to move between zones. To deepen students' understanding of how to self-regulate, the lessons set out to teach students these skills: how to read others' facial expressions and recognize a broader range of emotions, perspective about how others see and react to their behavior, insight into events that trigger their less regulated states, and when and how to use tools and problem solving skills. The curriculum's learning activities are presented in 18 lessons. To reinforce the concepts being taught, each lesson includes probing questions to discuss and instructions for one or more learning activities. Many lessons offer extension activities and ways to adapt the activity for individual student needs. The curriculum also includes worksheets, other handouts, and visuals to display and share. These can be photocopied from this book or printed from the accompanying CD.--Publisher's website.

Cued Articulation Jane Passy,2010 This publication is the revised edition of the Cued Articulation range. The previously separate titles Cued Articulation and Cued Vowels are now combined and updated, with this edition covering consonants, vowels, demonstrative images, and full color coding throughout. The book was originally devised to help severely speech and language handicapped children to see a sound and hear a letter by the use of easy and logical hand cues. The Cued Articulation system has, over the last three decades, proved to be an invaluable teaching tool. Its potential and practicality is widespread and utilized by speech pathologists, speech and language therapists, remedial and reading recovery teachers who find the approach helpful in showing phoneme-grapheme relationships, and primary teachers who use it in the classroom to teach children the sounds of speech. Teachers who teach correct pronunciation to those who have English as a second language also find it extremely useful, as do teachers of the hearing impaired who want their students to see the sounds they cannot hear. Also available to compliment the book is an instructional, interactive DVD (# 9780864319180), which includes demonstrations of the cues and sounds.
