Finding Our Way Through the Dark Demetra George, 2008 *Finding Our Way Through the Dark* presents an astrological lunar-based model to explore the periodic dark and difficult times in our life as rites of passage leading to renewal. It offers a new vision of darkness as a place of insight, healing and regeneration. Each section is accompanied by a workbook and journal so that you can discover when these periods of transition occur in your own life, illuminating the hidden motifs that shape your experiences. This book explains and reframes the astrological factors that facilitate your life journey from endings to new beginnings. Demetra George, M.A. Classics, received the 2002 Regulus Award for Theory and Understanding. A practitioner of astrology for more than 35 years specializing in archetypal mythology and ancient astrology, she is the author of numerous books and articles, including *Astrology For Yourself*, *Asteroid Goddesses*, *Mysteries of the Dark Moon*, and *Astrology and the Authentic Self*. She lives in Oregon, lectures internationally, and leads pilgrimages to the sacred sites in the Mediterranean and India with *Ancient Oracle Tours*. Director of *Thema: Foundations in Astrology*, she mentors private students in Hellenistic astrology, modern chart delineation, and asteroids.

Product-Service Integration for Sustainable Solutions Horst Meier, 2013-03-14 “An Industrial Product-Service System is characterized by the integrated and mutually determined planning, development, provision and use of product and service shares including its immanent software components in Business-to-Business applications and represents a knowledge-intensive socio-technical system.” – Meier, Roy, Seliger (2010) Since the first conference in 2009, the CIRP International Conference on Industrial Product-Service Systems has become a well-established international forum for the review and discussion of advances, research results and industrial improvements. Researchers from all over the world have met at previous IPS2 conferences in Cranfield (2009), Linköping (2010), Braunschweig (2011) and Tokyo (2012). In 2013, the 5th CIRP International Conference on Industrial Product-Service Systems is held in Bochum. Important topics of IPS2 research presented at the conference are: planning and development, sustainability, business models, operation, service engineering, knowledge management, ICT, modeling and simulation, marketing and economic aspects as well as the role of

the human in IPS2.

Philosophy Ranganayakamma, The question of unintelligibility does not arise with regard to books of fiction, such as the stories and novels, irrespective of how they are written. Even if a story is not understood, there is no great harm done. The problem is with the theoretical essays. Even there, there is no problem with the essays related to the natural science, if the language is simple. The real problem is with the books of philosophy! When we find the word 'philosophy' on the face of the book, we feel that 'this book is meant for the scholars, not for us,' The very word 'philosophy' at the outset will scare us immensely. When we read the word 'philosophy' on the face of a book, it does not mean that it represents 'a great truth' or 'a great science.' The contents of the book could be correct or useless or a blend of both. The logic of the book will be in accordance with the philosophy of the book. A correct one will have a correct logic, a wrong one will have a wrong logic, and a vacillating one will have a vacillating logic.

Discrimination and Diversity: Concepts, Methodologies, Tools, and Applications Management Association, Information Resources,2017-05-17 The growing presence of discrimination and isolation has caused negative changes to human interactions. With the ubiquity of these practices, there is now an increasingly urgent need to close this divide. *Discrimination and Diversity: Concepts, Methodologies, Tools, and Applications* provides a critical look at race, gender, and modern day discrimination and solutions to creating sustainable diversity across numerous contexts and fields. Including innovative studies on anti-discrimination measures, gender discrimination, and tolerance, this multi-volume book is an ideal

source for professionals, practitioners, graduate students, academics, and researchers working in equality, as well as managers and those in leadership roles.

Developing Workforce Diversity Programs, Curriculum, and Degrees in Higher Education Scott, Chaunda L.,2016-05-16 Workforce diversity refers to a strategy that promotes and supports the integration of human diversity at all levels and uses focused diversity and inclusion policies and practices to guide this approach in work environments. While this concept is not new, publications outlining the programming, curriculum, and degree demands that should exist in universities to promote workforce diversity skill development are missing. *Developing Workforce Diversity Programs, Curriculum, and Degrees in Higher Education* presents conceptual and research-based perspectives on course, program, and degree developments that emphasize workforce diversity skill development and prepare next-generation leaders for the modern and emerging workforce. Highlighting crucial topics relating to career development, human resources management, organizational leadership, and business education, this edited volume is a ground-breaking resource for business professionals, scholars, researchers, entrepreneurs, educators, and upper-level students working, studying, and seeking to advance workforce diversity learning across a variety of sectors.

Late Roman Dorset Black-Burnished Ware (BB1) Malcolm Lyne,2022-03-10 Much has been written about Roman Dorset Black-Burnished Ware (BB1) and its Late Iron Age Durotrigian origins since the industry was first recognised at the end of the 1960s. However, this has mostly focused on the forms produced and distributed during the 1st to 3rd centuries. This publication covers those of the late 3rd to early 5th century.

Aqueous Two-Phase Systems Rajni Hatti-Kaul,2008-02-05 A mixture of two polymers, or one polymer and a salt, in an aqueous medium separates into two phases: this phenomenon is useful in biotechn- ogy for product separations. Separation

of biological molecules and particles in these aqueous two-phase systems (ATPS) was initiated over 40 years ago by P.-Å. Albertsson, and later proved to be of immense utility in biochemical and cell biological research. A boost in the application of ATPS was seen when problems of separations in biotechnology processes were encountered. Its simplicity, biocompatibility, and amenability to easy scaleup operations make the use of ATPS very attractive for large-scale bioseparations. Despite the advantages ATPS enjoys over other separation techniques, the application of two-phase systems has for a long time been confined to selected labora- ries. Recent years have, however, shown a trend in which increasing numbers of researchers employ two-phase partitioning techniques in both basic and applied research.
